Add meaning to your story

Do you want to write a book that discusses important ideas? Do you need to flesh out your story's theme, setting and symbolism?

This course with award-winning author A. R. Levett helps you determine what deeper ideas you are trying to discuss by writing your story, teaching you how to convey them without coming across as preachy. You will develop your story's theme and discover how to use symbols and setting to express it so your book offers readers a rich experience beyond surface details.
